After 4 years between Europe & China in the web industry, I wish to take on agile, innovative & ambitious projects. A to Z tech projects with close user involvement are the most fulfilling. Through a dozen MERN stack projects, I have contributed to different architectures, designs and methods. I wish to focus on projects that have a positive impact and great growth potential.

Redilink - Social network for real estate professionals

Following a Linkedin architecture, built an iOS / Android mobile app for Swiss real estate professionals to connect & share content. Created a multilingual admin panel to update & analyse user information. Designed a CRUD backend app connecting the mobile & admin app to external APIs such as Contentful CMS for the admin to update the content, mailgun for mailing

Tech: *react native, react admin, react-query, materialUI, expressJs, jwt & figma, contentful, i18next & mailgun*

Chipedin - Peer-to-peer crowd-gifting service

Built a platform for individuals and KOL alike to receive gifts from their community using universal gift registry. Increased SEO through NextJs capabilities. Built the app around a CRM/CMS google spreadsheet approach for the admin to update content, user information & analyse user data.

Tech: *next.js, tailwindcss, framer motion, netlify, cloudinary, google-spreadsheet, stripe & mailgun*

Pureliving - Indoor environmental quality management system

Following SOLID guidelines, improved & re-factored a frontend application displaying environmental data in offices. Created data visualisation pages related to Covid. Implemented a responsive behavior.

Tech: *typescript, react, antdesign, chartJs & i18next*

Italki - Online language learning platform

Upgraded the platform from client rendering to server-side rendering (SSR) and static site generation (SSG) in Next.js. Subsequently, improved the SEO, page loading, web metrics & user experience.

Tech: *typescript, nextjs, react, tailwindcss & i18next*

Coventry University - Master of Entrepreneurship & Development - 2015|2017
Thesis: How to lead digital transformation through KPIs?
